EXPERIMENT 6

ROLL NO: 240701117 NAME: M.N.Dharaan

Aim :

To design and develop a mobile application interface for a Fashion & Clothing Store using the Rapid Application Development (RAD) model and evaluate its usability.

OBJECTIVE

- To understand the RAD model
- To design interactive UI screens
- To implement navigation between pages
- To create a user-friendly application

RAD MODEL IMPLEMENTATION

1. Requirements Planning

The application requirements were identified, including user login, clothing product browsing by category (tops, dresses, bottoms) and payment functionality.

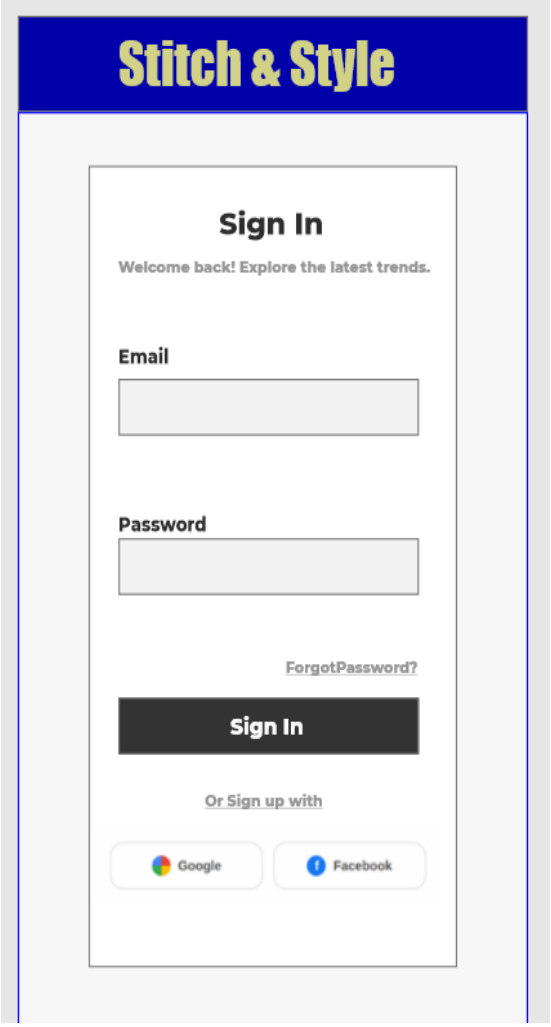
2. User Design

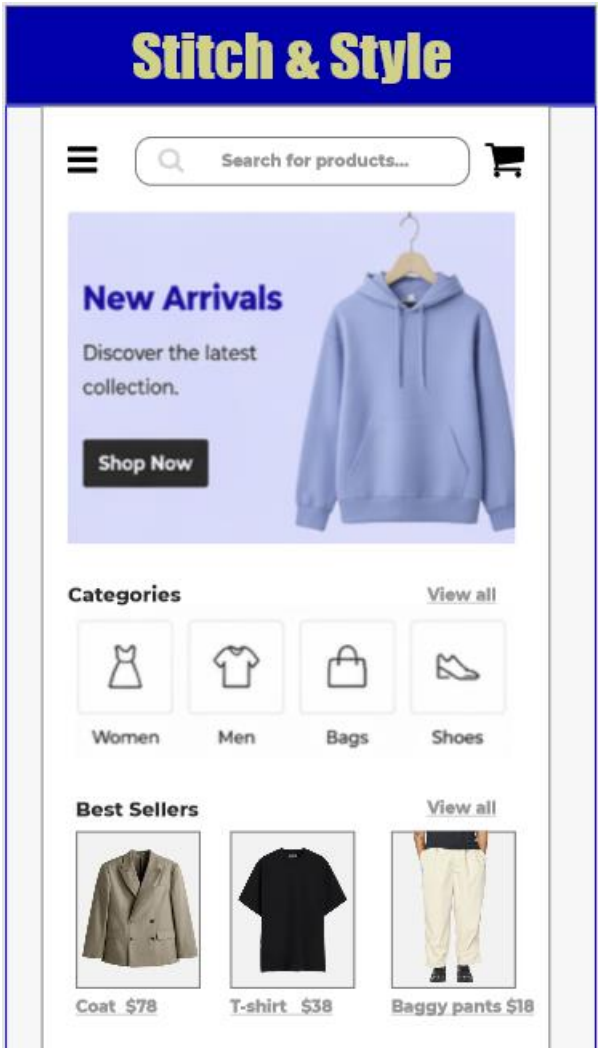
Home Page :

"Upon completing the required information and selecting 'Sign Up,' your Stitch & Style account will be created."

Interactions were added:

LOGIN -> Home Page

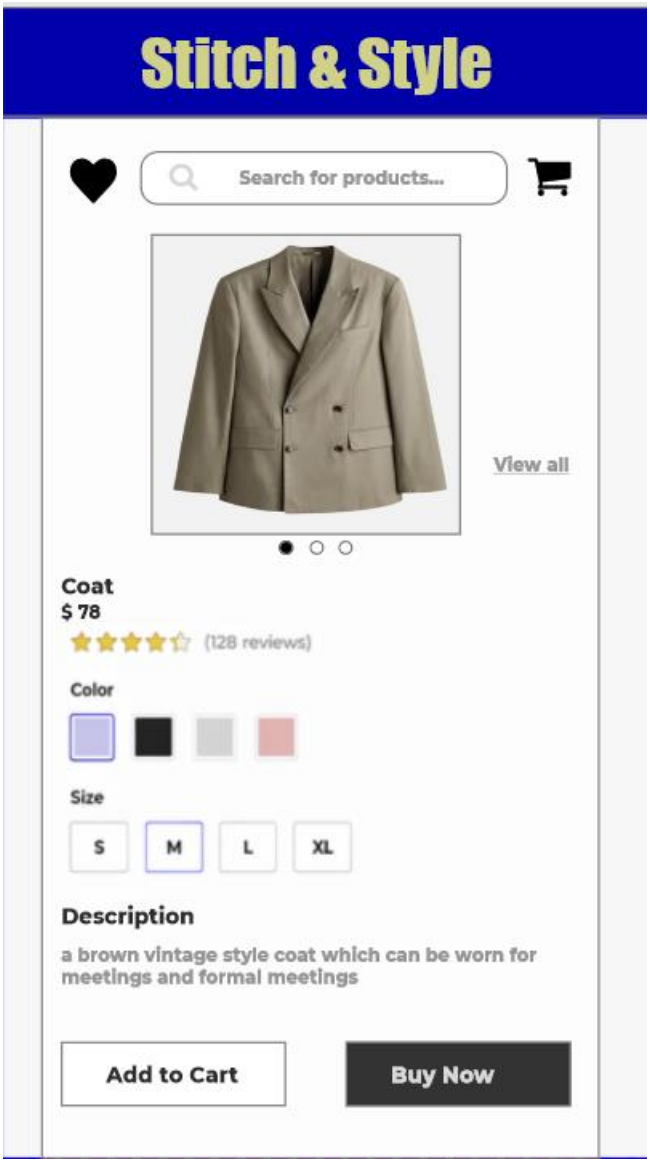




3. Rapid Construction :

Interactions were added:

Login → Home
Home → Product



4. Cutover

The application was tested and final output was verified.

Interactions were added:

- **Login → Home**
- **Home → Product**
- **Product → Payment**
